<p>I'm 47 years old, and work as a career advisor. I've dabbled in numerous IT-related areas, but I don't have any formal background. I'm finally following my own advice and doing something about that :-)</p> <p>I hope to get a more complete technical understanding, and to be able to work with security issues from both a technical and a human/user viewpoint.</p>	

## Your Availability

When creating (self-organising) teams for collaborative work it can be challenging to find times when you are all available to work together and hold your team meetings. You can use the following table to outline YOUR schedule, then share it with others to enable you to ensure that your final team will be able to collaborate during your time in Studio.

In the spaces below, please cross out the times when you will NOT be available to work outside scheduled classes on assignments with your team. Mark ONLY genuine conflicts, such as with classes or job responsibilities.
