1 Introduction

Course: UC1PR2101 Programming and Databases

S02-PR2-2020

1.1 Key dates

Duration:	6 weeks
Start:	2021-01-04
End:	2021-02-15
Formative assessment:	TBD
Assessment 1 - Submission date:	TBD
Assessment 2 - Submission date:	TBD

1.2 Course Tutors

Course leader:	Johan Van Niekerk
Course lecturer:	Rayne Reid
Course tutor:	Konstantin Lenchik
course tutor:	Mariya Chirchenkova
Support tutor:	Sohail Naseem (KRS)
Support tutor:	Arash Mithraian (OSL)

1.2.1 Study goals

- Working with database (SQLite)
    - Acquire fundamental skill about working with databases
    - How to design as simple normalized database
    - Understand database storage and data structure
    - Understand database Normalization
    - Be able to query and interface with databases
    - How to script and automate database connection, mangagement and datamining
    - Automate data manipulation and analysis, generating reports and statitics etc on data in databases, dataframes etc.
    - Understanding and being able to manage and work with databases is therefore key to the field of Cyber-Security.

2 Conclusion

Conclusion

This is the conclusion page with a code listing.

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.
